

FINAL YEAR PROJECT

Hall Booking & Management System

S.F. Safiya

KUR/IT/2324/F/0080

THE PROBLEM WE FOUND

Booking a hall the old way is hard

Everything written on paper

Hard to know which dates are free

Two customers can book the same date

Payments are hard to track

Customer records get lost

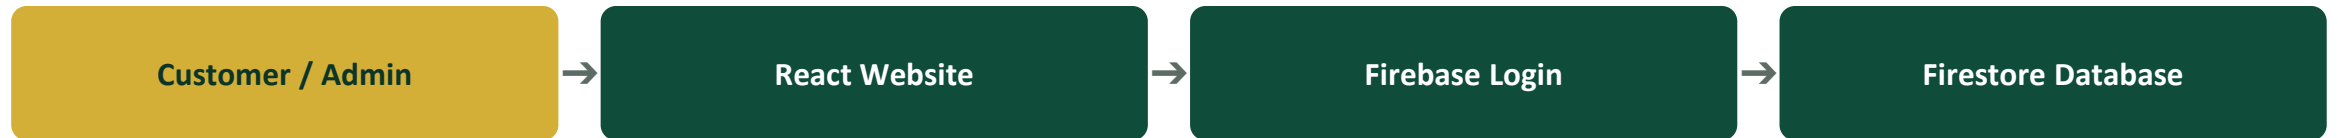

Reports take a long time to make

OUR GOAL

Build one easy online system for Camilla Banquet Hotel that makes booking, payment, and messages simple for everyone.

Who uses the system

Customer Can

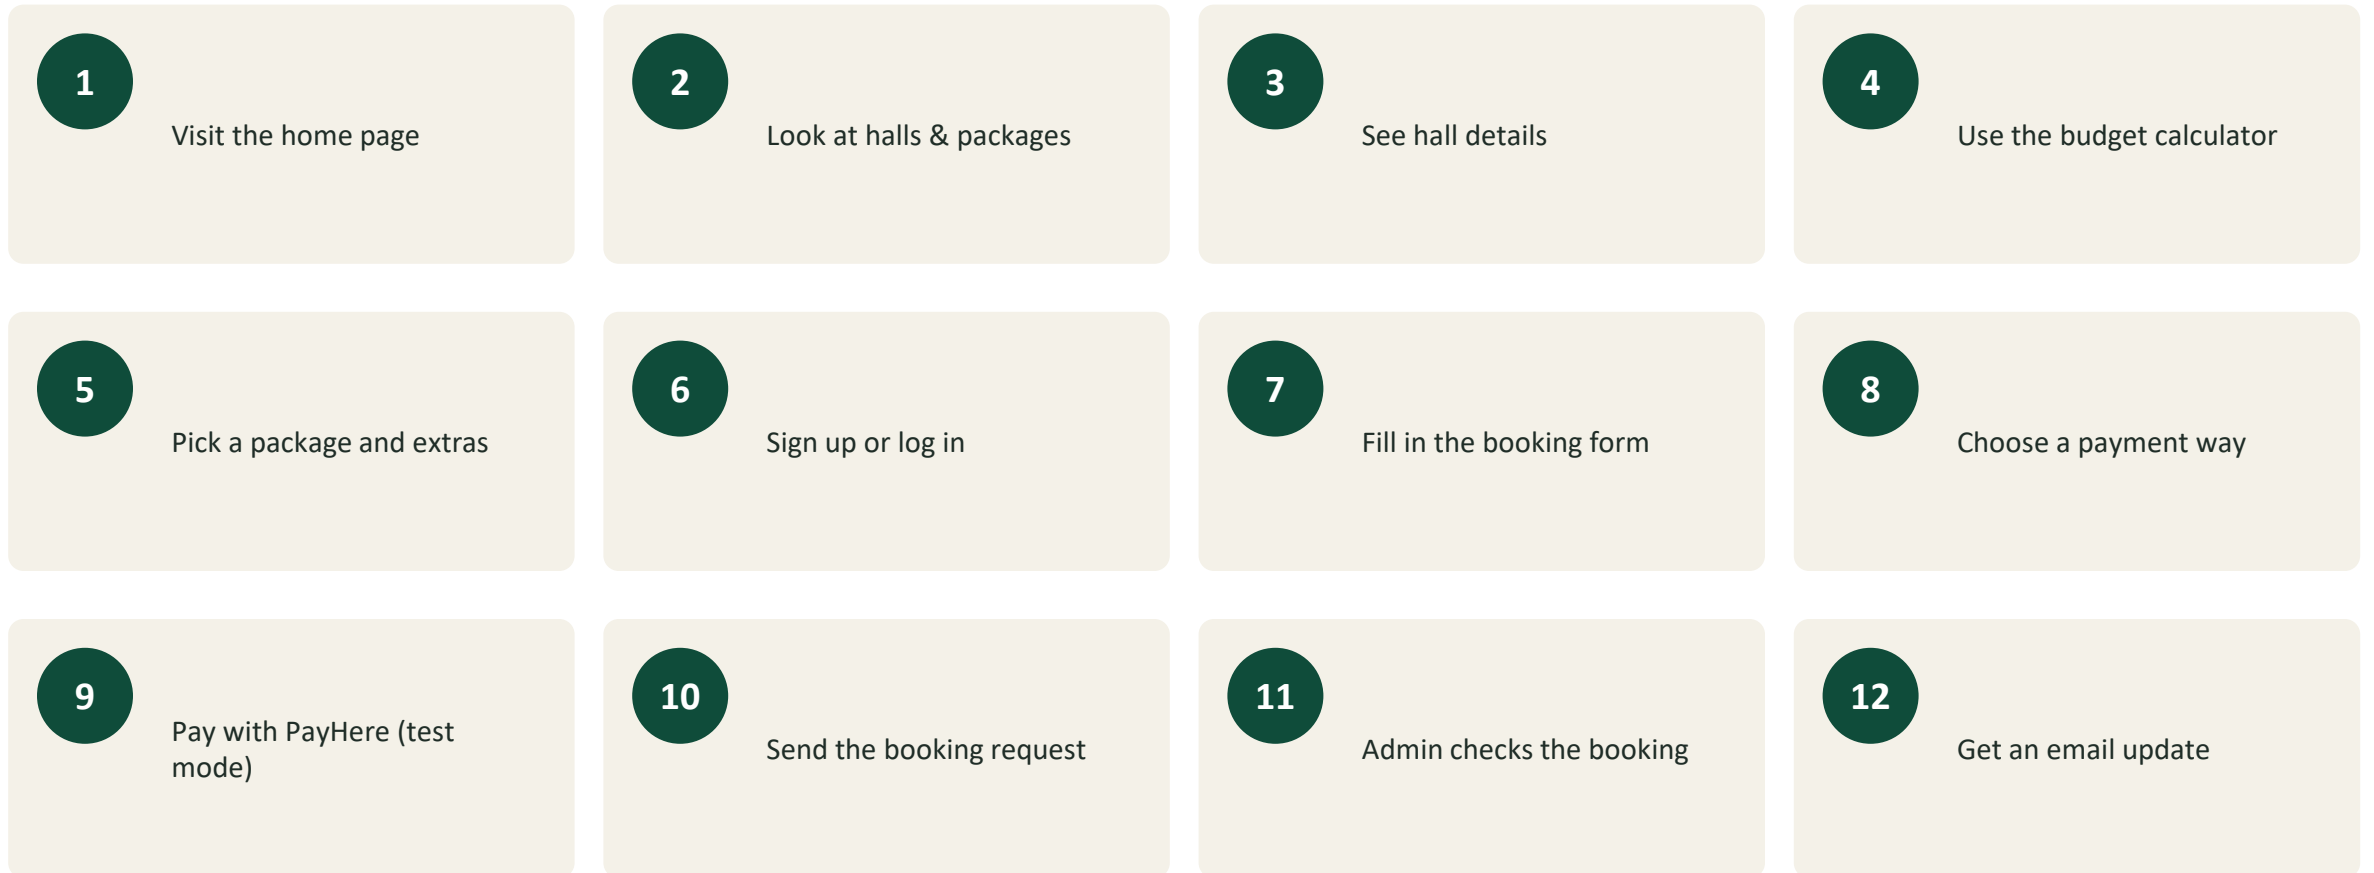

- Sign up and log in
- Look at halls and packages
- Check their budget
- Book a hall and pay
- See booking status and get updates

Admin Can

- Manage halls and prices
- Accept or turn down bookings
- Track all payments
- Manage customers and reviews
- Make reports and block dates

Steps a customer follows

Steps an admin follows

Log in safely

Secure sign-in through Firebase

Check the dashboard

See money made and other stats

See new requests

Look at bookings marked "Pending"

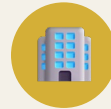

Accept or reject

Decide based on hall availability

Update payments

Add cash payments that come in

Manage halls

Change price, package, or dates

Make reports

Export monthly data as a PDF

What the system can do

Customer Features

- Safe login
- See all halls
- Pick a package & check budget
- Manage bookings
- Pay online (PayHere)
- Get email updates
- Leave a review

Admin Features

- See live stats on a dashboard
- Manage halls and packages
- Accept or reject bookings
- Manage customer info
- Track every payment
- Make PDF reports

TECHNOLOGY USED

Tools that power the system

Frontend

React, TypeScript, Vite, Tailwind CSS — makes the website fast and easy to use

Backend

Node.js and Express.js

Database

Firebase Firestore — updates data right away

Login

Firebase Auth — keeps user accounts safe

Payment

PayHere test mode, made for Sri Lanka

Extra Tools

EmailJS sends emails, jsPDF makes reports

CONCLUSION

A simple system that helps the hotel

HallCamilla gives Camilla Banquet Hotel one easy way to manage bookings online. It saves time, stops mistakes, and makes customers happier.

WHAT COULD COME NEXT

A mobile app for phones

Chat help for customers

Smarter future predictions

Real online payments

Smart booking suggestions

Thank You
